# reduce the increasing incidents of phone theft

**SDG 16 : Peace Justice & Institution**

## PROBLEM

phone theft is becoming more prevalent in Tunisia, affecting citizens safety, causing financial loss, and creating mistrust in public.

## SOLUTION

- Conduct campaigns to teach people how they can safely intervene during a theft.
- developing an app that enables witnesses to quickly record a theft, share the footage with local authorities, and alert others nearby.
- The app could feature a "Help Button" that instantly notifies police .

# QR Code Tracker for Lost People and Items

**SDG 3 : Good Health & Well-being**

**SDG 11 : Sustanabale cities & communities**

## PROBLEM

Elderly individuals with conditions like Alzheimer's, as well as children or lost belongings, are at risk of getting lost

## SOLUTION

- An app generates a QR code with essential personal and health information. The code can be scanned to quickly locate the individual or item, providing an efficient solution for recovery .

# Ocean Pollution

**SDG 14 : LIFE BELOW WATER**

## PROBLEM

Ocean pollution is a major environmental threat impacting marine life, ecosystems, and human health. Key issues include: Plastic Waste, Chemical Pollution, Noise Pollution, Ship Pollution.

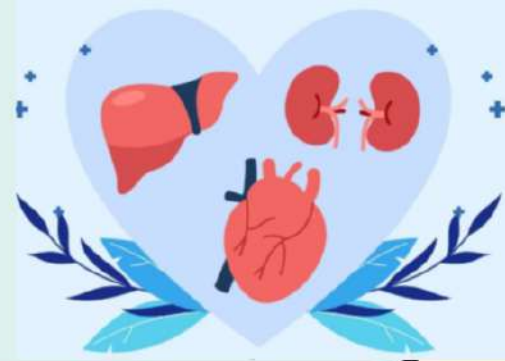

## SOLUTION

- Install Trash Bins & Beach Cleanup, New Cleanup Technologies ,Build Wastewater Treatment Plants, Maritime Activity Surveillance .

# organ donors

**SDG 3 : Good Health  & Well-being**
**SDG 10 : Reduced Inqualities**
**SDG 17 :  Parternership For The Good**

## PROBLEM

There's a shortage of organ donors, leading to long wait times for people in need of life-saving transplants. Lack of awareness and logistical hurdles prevent many from becoming donors

## SOLUTION

- our application connects organ donors with recipients through a smart matching system, streamlining the process and raising awareness. The app will simplify registration, provide education, and create a supportive community to increase donor participation and save lives
